

Co-57 Flood Sources

One Source. Every Source.

Eckert & Ziegler Family of Flood Sources

A Flood Source for Everyone's Needs

Eckert & Ziegler Isotope Products (EZIP) Co-57 flood sources offer high quality in a variety of styles, including lightweight Featherlite™, innovative Perflexion™ and C-Thru™ flood sources.

Every EZIP source features proprietary Cobalt chemistry in the manufacturing process to deliver superior source uniformity.

Each source is carefully measured for activity and scanned over the entire field of view to ensure a homogeneous distribution with a coefficient of variation of less than 1%.

Featherlite™

Featherlite weighs 50%-60% less than conventional models of comparative size. Lower weight means less strain to the back and greater maneuverability.

Perflexion™

Perflexion flood sources reduce bulk and weight with their unique flexible design and tungsten composite Wolfguard Shield.

C-Thru Series™

C-Thru's source holder is made of transparent, durable plastic. The radioactive area is clearly visible, enabling the C-Thru source to be easily positioned on the camera head.

No matter which design best fits your needs, you can count on EZIP's history of innovation, superior quality and exceptional customer care.

One Source. Every Source.

Quality Assurance

Eckert & Ziegler Isotope Products maintains a comprehensive Quality Management System based upon several standards and regulations set forth in NRC Regulatory Guide 6.9, ISO9001, and ISO13485.

Recommended working life

The recommended working life of a Co-57 flood sources is 2 years. Typical useful life is dependent on nuclide selection.

Availability

Most sources are in stock and can be delivered within 5 business days.

Source Return

Eckert and Ziegler will take back a flood source for recycle on a one for one basis. A source may be returned as long as the equivalent replacement source is purchased from EZIP.
