## **Black and White Transmission Densitometer DT-300**

### **Characteristic:**

LED Lighted Table, 5 steps of luminance and 2 areas for selection

High spot luminance, simplifies location of image areas to measure

Program Mode for custom calibration

The densitometer will remain in proper alignment even though it is picked up by the arm

Calibrated to AGFA film strips

Measuring Range: 0 - 6.0D, High Accuracy  $\pm 0.02$  D

No warm-up time

Soft Rubber probe head to protect films

PC Utility available(AUTO Recalibration and Add Logs using USB connect to PC)
